Second Class Requirement 2d4
"Describe the safety procedures for
using these types of stoves."
(Handbook page 310)

Name

Fill in the blanks using a word or phrase from this list:

- a. Make sure the stove is perfectly level before you start cooking
- b. If the stove is not level, a pot or pan might slide off
- c. Keep your hands and face away from the pot
- d Use pot tongs or a specialized "lid lifter"
- e. Something that can catch fire might be too close to the stove
- f. Make sure that wrappers and other burnables are well away
- g. The cook might spill hot stuff onto his feet
- h. Spatter
- i. Steam will come out in a rush
- j. Hot coals might drop into food being cooked
- k. Stand well back
- L. The cook better be wearing close-toed shoes

1. Assume you are frying something and you have greased the frypan or the skillet with cooking oil or butter.

The safety issue to be concerned about is that the cooking oil or butter might

The way to avoid a burn is to

2. Assume you cooking spaghetti in a covered pot of boiling water, and that lots of steam is building up under the pot lid. Assume you are about to remove the lid:

The safety issue to be concerned about is that the built-up

The way to avoid a burn is to

3. Assume you have set up camp in a hilly area, where nothing is level.

The safety issue to be concerned about is that

The way to avoid a burn is to

4. Assume that you have all kinds of empty food wrappers scattered around the "kitchen" work area.

The safety issue to be concerned about is that

The way to avoid a burn is to

5. Assume that the current cook is known to be clumsy and often lets things drop or spill.

The safety issue to be concerned about is that

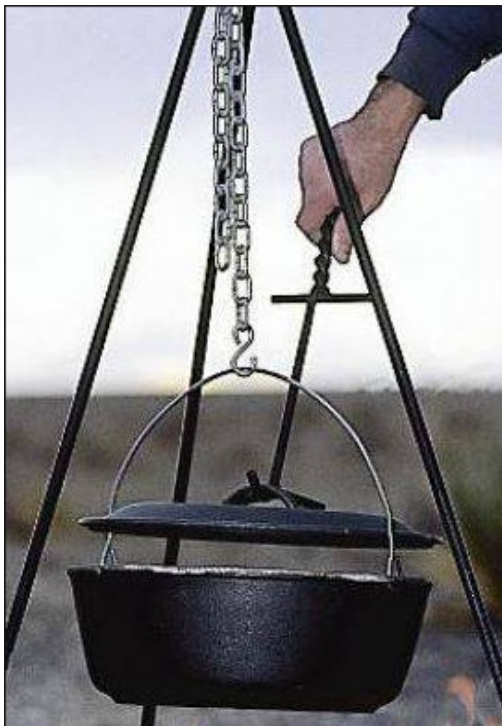

The way to avoid a burn is to

6. Take a look at this Dutch oven, in which we're baking an apple cobbler for dessert. Note the ring of hot coals on the top lid. It's now time to remove the lid.

The safety issue to be concerned about is that

The way to avoid a burn is to
